

# Make a recycling bin

## You will need:

1. Cardboard box
2. Scrap paper (coloured or plain) – or even newspaper
3. Pens, coloured pencils or paints
4. Glue or sticky tape

## What to do:

1. Cover the box in newspaper or coloured/plain paper.
2. Glue or tape it down firmly.
3. Draw different signs on the boxes to show what could go in each.
4. Keep the bins in your room or somewhere in the house and use them every time you recycle.
5. When the box becomes worn or damaged, recycle the box and make a new one.

Now you have separate bins for recycling, your rubbish to be separated, making it handy for everyone to recycle. Then your rubbish can be made into something new instead of being sent to landfill sites, which harm the environment, by giving off gases that add to climate change.
